Professional Summary

Full Stack Developer with hands-on experience building and deploying production web and mobile applications using React.js, React Native, TypeScript, Node.js, Express.js, Fastify, Java, and Spring Boot. Developed applications serving 10,000+ downloads and 5,000+ active users, with experience designing RESTful APIs, database models, authentication systems, third-party integrations, and performance optimizations. Achieved 40% faster API response times and 25% faster application cold-start through backend and application optimization. Experienced with PostgreSQL, MySQL, MongoDB, Redis, AWS, Git, CI/CD, Agile/Scrum, and unit testing.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, SQL

Frontend: React.js, React Native, Next.js, Angular, Tailwind CSS, NativeWind

Backend & Frameworks: Node.js, Express.js, Fastify, Spring Boot, RESTful API Design, JWT Authentication

Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis, Supabase

Cloud & Tools: AWS (EC2, S3), Git, GitHub, Azure DevOps, Postman

Development Practices: Agile/Scrum, Unit Testing, Code Review, Component-Driven Architecture

Experience

Software Developer Intern

Jan 2025 – Jul 2025

TalentLo

- Developed reusable, responsive, and accessible frontend components using React.js, TypeScript, and Tailwind CSS following component-driven architecture and responsive design principles.
- Integrated RESTful APIs, optimized frontend-backend communication, debugged production issues, and improved feature delivery by **2 weeks per sprint**.
- Collaborated with cross-functional teams in Agile ceremonies, peer code reviews, unit testing, Git workflows, and CI/CD pipelines while maintaining **zero regression issues** across three production releases.

Projects

PrepCET — MHT-CET Learning Platform

Play Store

React Native, TypeScript, Node.js, AWS EC2, PostgreSQL, Supabase, Razorpay

- Developed and deployed a production-ready cross-platform mobile application using React Native, TypeScript, and Node.js, serving **10,000+ downloads and 5,000+ active users**.
- Designed and implemented RESTful APIs, PostgreSQL database models, reusable UI components, and business logic for a percentile prediction engine, a college recommendation system covering **375+ colleges and 2,000+ branches**, and an automated option-form generator.
- Optimized database queries and backend APIs hosted on AWS EC2, reducing response time by **40%**, and integrated Razorpay payment gateway for secure subscription purchases.

Vardhaman Blinks — Quick Commerce Platform

Live Demo

React Native, React.js, TypeScript, Fastify, PostgreSQL, Redis, TanStack Query, Zustand, AWS

- Developed a scalable quick-commerce platform spanning customer, wholesaler, admin, and delivery applications using React Native, React.js, Fastify, and PostgreSQL.
- Built reusable UI components, integrated RESTful APIs, implemented Redis caching, and optimized backend performance to improve API response times and scalability.
- Implemented Google OAuth 2.0 authentication, Razorpay payment gateway, Zustand state management, and TanStack Query server-state management, reducing application cold-start time by **25%**.

Online Assessment Platform — Coding Assessment System

Live Demo

Java, Spring Boot, Spring Security, MySQL, Judge0 API, Monaco Editor

- Developed a scalable online assessment platform with a collaborative coding environment supporting real-time code execution and automated evaluation across **10+ programming languages** via the Judge0 API.
- Engineered an automated evaluation system executing **100+ test cases** per assessment, JWT-based authentication with role-based access control, timed auto-submit tests, and an admin dashboard managing **500+ submissions**.
- Built RESTful APIs with Spring Boot and Spring Data JPA, integrated the Monaco code editor for a VS Code-like experience, and deployed the application on Railway with MySQL.

Education

R. C. Patel Institute of Technology, Shirpur — B.Tech in Computer Engineering (CGPA: 7.21)

Expected May 2027

R. V. College of Science and Arts, Chalisgaon — HSC (Maharashtra Board), 61%

2021–2023

Leadership & Community

Core Team Member

Sep 2024 – Jul 2026

Google Developer Group (GDG) on Campus, RCPIT

- Coordinated a 30+ member cross-functional team (technical, media, design, operations) to plan and deliver developer-focused technical workshops and hackathons.
- Grew community engagement by **40%** by organizing hackathons, coding workshops, and bootcamps attended by **100+ participants per event**.
